- be unable to provide new, or continue to provide all services to you; and
- be required to withhold payments or benefits that would otherwise be due to you or your policy and pay them to tax authorities; and
- terminate your policy.

In the event that any benefit or payments is withheld and/or your policy is terminated by us as a result of any of the above reasons, the amount you receive plus the total amount you have received before policy termination (if any) may be less than what you have paid. We recommend that you seek your own independent professional advice on your tax liabilities and tax positions related to your policy.

Key risks

Please take note of the following key risks before taking up the HSBC Family Protector:

Credit and insolvency risks	HSBC Family Protector is an insurance policy issued by us. You are subject to our credit risk because all your premiums paid become part of our assets. You do not have any rights or ownership over any of our assets. You can only claim against us under all circumstances.
Risk from the delay or missing the payment of premiums due	Delayed or missed payments may lead to a discontinuation of your policy. As a consequence, the policyholder/life insured will not be covered by the policy and you will not get back the premiums you have paid.
Risk from surrender	For any policy surrender after policy issuance, no refund of premiums will be paid (except during Cooling-off Period).
Inflation risk	You must take into account the risk of inflation, which will likely cause the future cost of living to rise. With inflation in place, you should expect that you or your assigned beneficiary(ies) will receive an amount that is less in real terms in the future, even if we have done our best to serve your policy.
Risk from premium adjustment	Premium will be adjusted every 10th policy anniversary until the policy is terminated. The premium adjustment will be determined in accordance with our prevailing premium rate applicable to this class of policy and the age of the Life Insured at the time of adjustment. Due to the increase of age over time, premium rate may increase at the time of adjustment. Such premium rate will be determined based on factors including but not limited to actual claims experience, outlook of future claims experience, policy lapses as well as our operating expenses at the time of adjustment. A notice of such premium adjustment will be sent to the policyholder prior to it taking effect.

Endnotes:

1. Subject to the policy's underwriting limit.
2. Your monthly premiums will stay the same for the first 10 years, then the premiums will be adjusted every 10 years until your policy ends or until you reach the age of 80 (ANB), whichever is later - regardless of how the state of your health changes.
3. All the biological, step or legally adopted children who are 15 days after birth to the age of 18. Age refers to the age of the life insured's child will be on his or her next birthday.
4. The cash payment arrangement of Hospital Cash Benefit under Child Protection will be the same as the life insured's Hospital Cash Benefit: (1) Double daily cash payments if intensive care or overseas hospitalisation is needed; (2) Half of the daily cash payments will be payable if the child is hospitalised in mainland China; (3) Daily cash payments to be paid for up to a maximum of 730 days per any one period of the covered disability.
5. If any of your nominated beneficiaries fall under the relationship status of grandchildren, grandparents, stepchildren, step parents, step brother, step sister, cohabiting or non-cohabiting partner, you'll be required to submit the relevant declaration or documents as proof of an insurable relationship between the life insured and the nominated beneficiaries. Please refer to the relevant declaration form for nominating a non-cohabiting partner or the form for all other relationships listed.
