Eligible Order Types

Only limit price orders are permitted under the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect.

Order amendments are not supported in SSE and SZSE. As an alternative, you may cancel your previous order and place a new one. In this case, however, your new buy order may not be accepted under circumstances where, for example, the remaining Daily Quota has already dropped below zero.

Price Limit for Buy and Sell Orders

For China A Shares, there is a general price limit of $\pm 10\%$ ($\pm 5\%$ for stocks in the risk alert board) based on previous closing price.

In addition, buy orders with an input price that is 3% lower than the current best bid* will be rejected. According to the arrangement of HKEx, the price limit may be adjusted from time to time subject to market conditions.

For ETFs, there is a general price limit of $\pm 10\%$ ($\pm 20\%$ for some ETFs specified by SSE and SZSE) based on previous closing price.

* The reference price will be the last traded price in the absence of current best bid, or previous closing price in the absence of both current best bid and last traded price

Note:

When we, HSBC (or its relevant broker) submits your order to an exchange, we do so in an orderly manner and in comply with any applicable local regulation/exchange trading rules/market requirements. Under certain circumstances, for example, if your order requested price is away from where the security is trading or if the order is particularly large to the market, we may need to reject the order without prior notice to you to ensure the market integrity and protect your interest. If your order is rejected, the order status will change to 'unexecuted' within the 'Order Status' enquiry. Please be reminded to check the latest order status.

In situations where we need to contact you to confirm the order details, we will not place your order to the exchange for execution until clarification is obtained.

Quota

Trading under Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect will each be subject to a Daily Quota.

The Daily Quota for each China Connect Eligible Securities market will apply on a "net buy" basis. Under that principle, investors will always be allowed to sell their cross-boundary securities or input order cancellation requests regardless of the quota balance. The balance of the Daily Quota for each China Connect Eligible Securities market will be disseminated on HKEx website at 1-minute intervals.

Daily Quota (RMB52 billion for each China A Share market)

Daily Quota Balance = Daily Quota – Buy Orders + Sell Trades + Adjustments

The Daily Quota for each China connect eligible securities market is calculated in real-time during trading hours. It limits the maximum net buy value of cross-boundary trades on the relevant China connect eligible securities market under Shanghai-Hong Kong or Shenzhen-Hong Kong Stock Connect (as the case may be) on each trading day. Once the Daily Quota Balance for the relevant China Connect Eligible Securities market drops to zero or is exceeded:

During opening call auction	New buy orders on the relevant China Connect Eligible Securities market are rejected until quota balance becomes positive (e.g. due to buy order cancellation). You can retry placing your buy orders at a later time on the same trading day.
During continuous auction	Buy orders on the relevant China Connect Eligible Securities market are suspended for the remainder of the trading day. You can retry placing your buy orders in the next trading day.
During closing call auction (for Shenzhen only)	Buy orders are suspended for the remaining of the trading day. (i.e. following the mechanism of continuous trading)

Buy orders already accepted will not be affected by the Daily Quota being used up and will remain on the order book of SSE or SZSE (as the case may be) unless otherwise cancelled by the customers or by the trading system of the SSE or SZSE (as the case may be).

Board Lot/Odd Lot Orders

All China A Shares are subject to the same board lot size, which is 100 shares (100 units for ETFs). Buy orders must be in board lot.

Please note odd lot trading in China Connect Eligible Securities is available only for sell orders. You must sell your available odd lots of the same stock in one single order, but not partial only. It is common that a board lot buy order may be matched with different odd lot sell orders, resulting in odd lot trades.

Unlike the trading of SEHK-listed shares in Hong Kong, board lot and odd lot of China Connect Eligible Securities are both matched on the same platform on SSE or SZSE (as the case may be) and are subject to the same share price.

Day Trading

Day trading in China Connect Eligible Securities is not permitted. If you buy shares on T day, you may be able to sell only on or after settlement of the buy trade has been completed (normally on T+1 day).

Shareholding Restriction

According to China's rules, all foreign investors' shareholding in the China A Shares of a China listed company is not allowed to exceed 30% of its total issued shares. When the aggregate foreign shareholding exceeds the 30% threshold, the foreign investors concerned will be requested to sell the shares on a last-in-first-out basis within 5 trading days which may lead to gain or loss to investors.

The maximum shareholding of a single foreign investor in the A shares of a China listed company is 10%. If you hold or control up to 5% of a China listed company, you have the responsibility to disclose the holding and are not allowed to trade in the shares of that company within 3 working days.
