March 2018
A FLEXIBLE AND EFFECTIVE WAY TO PROTECT YOU AND YOUR FAMILY

As you journey through life, pursuing your goals becomes more and more important. Ensuring financial security for your loved ones is a key part of that, but it takes careful planning to make it happen.

How does Goal Access Universal Life Plan (Protection) work?

Goal Access Universal Life Plan (Protection) (the “Plan” or the “Policy”) combines life protection with the flexibility to cater for your changing needs.

The Plan is a long term universal life insurance policy with savings element. It includes a life insurance cover for the Life Insured throughout the policy term while offering potential growth in your savings in the form of non-guaranteed daily interests and loyalty bonus.

Taking into account today’s dynamic lifestyle needs, the Plan provides the flexibility to partially withdraw cash from the policy, adjust your sum insured or your premium payment to meet your needs that may arise along the way.

The Plan is not equivalent or similar to any kind of deposit.
**Notes:**

i. When you pay Planned Premiums\(^2\) or Unscheduled Premiums\(^3\) or any Supplementary Benefit premiums\(^4\), an upfront Policy Premium Charge is deducted and the net premium amount would accumulate as the Account Value.

ii. Policy Expense Charge and Insurance Charge are deducted from the Account Value on a monthly basis.

iii. An increase in Sum Insured is subject to underwriting and an increase in the Policy Expense Charge and Insurance Charge. Such increase in Sum Insured is subject to minimum and maximum amounts as determined by the Company from time to time.

iv. A decrease in Sum Insured is subject to a minimum remaining Sum Insured being maintained under the Policy, as determined by the Company from time to time. Reduction in Sum Insured is also subject to applicable Surrender Charge.

v. Interests according to the prevailing General Crediting Interest Rate is credited to the Account Value on a daily basis. The General Crediting Interest Rate, though it is not guaranteed and may vary while your Policy is in force, will not be less than the Guaranteed Minimum Crediting Interest Rate.

vi. Loyalty Bonuses are credited to the Account Value of your Policy twice during the policy term, the first time at the 20\(^{th}\) Policy Anniversary and the second time at the 30\(^{th}\) Policy Anniversary.

vii. You may access the Account Value by withdrawal which is subject to applicable Surrender Charge in the first 10 Policy Years. The Account Value will also be paid out upon policy surrender (subject to applicable Surrender Charge in the first 10 Policy Years) or policy maturity.
WHAT CAN YOU GET DURING THE POLICY TERM?

Financial returns to grow your savings

- **Daily interests** (if any) will be credited to the Account Value at a General Crediting Interest Rate, as declared by the Company from time to time, throughout the term of the Policy.

- **Loyalty Bonus**, will be credited twice to the Account Value of your Policy during the policy term, once at the 20th Policy Anniversary and once at the 30th Policy Anniversary.

Financial flexibility for your evolving needs

- You may choose to pay the Planned Premiums monthly or annually over five years, or in one lump sum as a single premium.

- Should unexpected events occur, you may withdraw cash from the Account Value of your Policy after a defined period, depending on the premium payment frequency.

- You can adapt to your changing protection needs by increasing or decreasing the Sum Insured.

- Unscheduled Premiums can be contributed to enhance the Account Value of your Policy.

- For corporate-owned Policy, Policyholders can change the Life Insured twice during the policy term if the company’s key person being covered under the Policy changes.
HOW MUCH PROTECTION CAN YOU ENJOY?

**Life cover**

The Life Insured can enjoy life protection while the Policy is in force. In the unfortunate event of the death of the Life Insured, the Beneficiary(ies) will receive the Death Benefit (please refer to the Product Summary for details).

**Extra protection**

The following Supplementary Benefits are embedded in the Basic Plan, subject to eligibility, with no additional premium required:

- **Terminal Illness Benefit**—The Death Benefit will be paid in advance if the Life Insured is diagnosed with a terminal illness before the age of 65 and such illness is likely to result in death within 365 days. The Policy will be terminated upon the payment of the Terminal Illness Benefit.

- **Waiver of Premium on Disability Benefit**—If the Life Insured suffers a disability while the Policy is in force and before the age of 65 and remains so disabled for a continuous period of 183 days, the Company will pay the future outstanding Planned Premiums and any Supplementary Benefits Premium under the Policy on your behalf until the Life Insured’s full recovery or until the end of the premium payment period (whichever comes first).

- **Payor’s Benefit (for a child’s Policy)**—You can take out a Policy to cover your child who is from 15 days after birth to Insurance Age of 18 such that if the Policyholder was to die or become temporarily disabled for a continuous period of 183 days before the age of 65, the Company will pay the future outstanding Planned Premiums and any Supplementary Benefit Premium under the Policy until the Policyholder’s full recovery or until the end of the premium payment period (whichever comes first).

The following Supplementary Benefit is optional with additional premiums required:

- **Major Illness Benefit (Advance Payment)**—The Death Benefit of the basic plan will be paid in advance if the Life Insured is diagnosed with one of the 60 covered major illnesses while the Policy is in force. The Policy will be terminated upon the payment of the Death Benefit. Please refer to the respective factsheets (if any) and Policy Provisions for detailed terms and conditions and exclusions of the above Supplementary Benefits.
ILLUSTRATIVE EXAMPLE

Important Notes:

i. The illustrative example is for reference only and the graph is not shown in scale.

ii. The example is illustrated based on the assumption that the Policy is bought to cover the life of a male non-smoker, with Insurance Age 40, who has chosen a 5-year premium payment period. It also assumes that there is no optional Supplementary Benefit being chosen and no change to the Policy after inception.

iii. The Account Value under the Guaranteed Basis may not be able to cover the applicable policy fees and charges. If the Account Value drops to zero or less, the policy may lapse.

iv. Actual Account Value and Death Benefit vary case by case depending on the prevailing General Crediting Interest Rate and applicable policy charges. The actual future Account Value may be lower or higher than that illustrated above.

Loyalty Bonuses will be credited to the policy account at the 20th and 30th Policy Anniversaries

Account Value under the Guaranteed Basis

Account Value under the Current Assumed Basis (Non-Guaranteed)

Death Benefit equals to the higher of:
• Sum Insured amount less any withdrawal amount (before any Surrender Charge) which is made from the 12 months preceding the date of death of the life insured to the claim approval date or
• Account Value, less any outstanding charges.

Surrender Charge is not applicable from Policy Year 11th onwards

"Guaranteed Basis" is the worst case scenario which assumes Maximum Charges with Guaranteed Minimum Crediting Interest Rate
- Policy lapses when Account Value drops to below zero.

"Current Assumed Basis (non-guaranteed)" assumes current charges with projected General Crediting Interest Rate
- Policy stays in force as long as its Account Value is sufficient to cover the policy fees and charges.

| Death Benefit    | The higher of:  
|                  | • Sum Insured amount less any withdrawal amount (before any Surrender Charge) which is made from the 12 months preceding the date of death of the Life Insured to the claim approval date; or  
|                  | • Account Value, less any outstanding charges.  
|                  | The Account Value is determined on the date of the written notification of the Life Insured’s death being received by the Company. |
| Adjustable Sum Insured | The Sum Insured can be adjusted after the end of the premium payment period for a regular premium Policy, or on or after the first Policy Anniversary for a single premium Policy.  
|                  | Notes:  
|                  | • Increasing the Sum Insured is subject to (i) underwriting; and (ii) an increase in the Policy Expense Charge and Insurance Charge. For details, please refer to “Policy Expense Charge” and “Insurance Charge” under the section “Details of Charges”.  
|                  | • Reducing the Sum Insured may induce a Surrender Charge. For details, please refer to “Surrender Charge” under the section “Details of Charges”. |
| Change of Life Insured (only applicable to corporate Policyholders) | For corporate-owned Policies, the Plan allows the corporate Policyholder to change the Life Insured up to twice during the policy term, subject to underwriting requirement and charges.  
|                  | If such request is accepted by the Company, the Company reserves the right to impose a Change of Life Insured Charge in relation to such request as the Company shall determine from time to time. Acceptance of any replacement Life Insured is entirely at the Company’s discretion. |
## Withdrawal
For a regular premium Policy, withdrawal from the Account Value of the Policy can be made after the end of the premium payment period. For a single premium Policy, withdrawal from the Account Value of the Policy can be made on or after the first Policy Anniversary.

**Notes:**
- Withdrawals are subject to (i) a Surrender Charge applicable in the first 10 Policy Years depending on the Policy Year and premium payment period; (ii) a minimum amount of USD625 per withdrawal; and (iii) a minimum Account Value balance of USD2,500 after withdrawal, where (ii) and (iii) will be determined by the Company from time to time.
- Withdrawals will reduce the Account Value which may reduce the Death Benefit and increase the chance of policy lapses. The Policy will lapse when the Account Value is not sufficient to cover the policy charges for 45 consecutive calendar days.

## General Crediting Interest Rate
Daily interests are accrued in the Account Value based on the General Crediting Interest Rate declared by the Company from time to time. The General Crediting Interest Rate, though it is not guaranteed and may vary while your Policy is in force, will not be less than the Guaranteed Minimum Crediting Interest Rate.

## Guaranteed Minimum Crediting Interest Rate
2% p.a. for the first 10 Policy Years and 0% p.a. thereafter.

## Loyalty Bonus
The Loyalty Bonuses will be credited to the Account Value of your Policy twice during the policy term, with the first time at the 20\(^{th}\) Policy Anniversary and the second time at the 30\(^{th}\) Policy Anniversary.

\[
\text{Loyalty Bonus} = 5\% \times \text{average Account Value of the past 60 policy months}^{15} \text{ of the relevant Policy Anniversary}
\]

## Embedded Supplementary Benefits (with no additional premiums required)
1. Terminal Illness Benefit\(^7\)
2. Waiver of Premium on Disability Benefit\(^9\)*
3. Payor’s Benefit\(^10\)*
*Not applicable to single premium policy.

## Optional Supplementary Benefits (with additional premiums required)
Major Illness Benefit (Advance Payment)\(^{13}\)

</tbody>
</table>
| Insurance Charge                             | The Insurance Charge per month is calculated as follows:  

\[
\text{Monthly Cost of Insurance Rates} = \frac{\text{Sum at Risk}}{1,000} \times \text{Sum at Risk} 
\]

The Sum at Risk is calculated as:  

\[
A - B 
\]

where,

A is the Sum Insured less any withdrawal amount (before any Surrender Charge) made in the 12 months preceding or on the relative Monthiversary, subject to a minimum of 0; and

B is the Account Value.

The cost of insurance rates varies by age, gender, underwriting class and country of residency. A full list of current monthly cost of insurance rates can be found in your proposal illustration.

The Company reserves the right to increase the cost of insurance rates at any time, but to no more than 150% of the standard rates. | Account Value                                     |

| Insurance Charge for Major Illness Benefit (Advance Payment)\(^13\) | Should you choose to attach the Major Illness Benefit (Advance Payment)\(^13\), an additional Insurance Charge for this benefit will be deducted from the Account Value. The Insurance Charge for this benefit per month is calculated as follows:  

\[
\text{Monthly Cost of Insurance Rates for this benefit} = \frac{\text{Sum at Risk}}{1,000} \times \text{Monthly Cost of Insurance Rates for this benefit} 
\]

The Sum at Risk is calculated as shown in the “Insurance Charge” section above. The cost of insurance rates for Major Illness Benefit (Advance Payment)\(^13\) varies by age, gender, underwriting class and country of residency. A full list of current monthly cost of insurance rates for Major Illness Benefit (Advance Payment)\(^13\) is shown in your proposal illustration.

The Company reserves the right to increase such cost of insurance rates at any time, but to no more than 130% of the standard rates. | Account Value                                     |
Change of Life Insured Charge (Only applicable to corporate Policyholders)

The Company reserves the right to impose a Change of Life Insured Charge in relation to such request and such charge is determined by the Company from time to time.

Surrender Charge

A Surrender Charge is payable in the following situations:

1. Surrender and Lapse:
   \[
   \text{Surrender Charge rate} \times \text{Account Value}
   \]

2. Withdrawal:
   \[
   \text{Surrender Charge rate} \times \text{Withdrawal amount}
   \]

3. Reduce Sum Insured:
   \[
   \text{Account Value} \times \text{Surrender Charge rate} \times \% \text{ of reduction in Sum Insured}
   \]

Surrender Charge rates are set out in the table below:

IMPORTANT NOTES

Cooling-off Period

The Goal Access Universal Life Plan (Protection) is a long-term universal life insurance plan with savings elements. Part of the premium pays for the insurance and related costs including but not limited to policy acquisition, maintenance and claims costs.

If you are not satisfied with the Policy, you have a right to cancel it and obtain a refund of any premiums and levies paid by giving written notice. To cancel, you must sign on such notice, return the Policy (if received) and ensure that such notice and the Policy are received directly by the office of HSBC Life (International) Limited at 18/F, Tower 1, HSBC Centre, 1 Sham Mong Road, Kowloon, Hong Kong within the Cooling-off Period (that is, 21 days after the delivery of the Policy or issue of a Notice informing the availability of the Policy to you or your representative, whichever is earlier).

After the expiration of the Cooling-off Period, if you cancel the Policy before the end of the Policy Term, the Account Value that you receive may be less than the total premium you have paid.

Suicide

If the Life Insured dies by suicide, whether sane or insane, within one year of the Issue Date or from the effective date of reinstatement or the effective date of the last Change of Life Insured (if applicable) (whichever is the latest), the Company’s liability will be limited to the amount of premiums paid to the Company less any amount paid by the Company to you since the Policy Date. If the Life Insured dies by suicide, whether sane or insane, within one year of the date of any increase in the Sum Insured, such increase shall be deemed not to have taken effect in determining the Death Benefit payable and any additional premiums or charges arising as a consequence of the increase in Sum Insured shall be reversed. Please refer to Policy Provisions of the Basic Plan for detailed terms and conditions.

Tax reporting and financial crime

The Company may from time to time request information from you regarding you and your Policy for the Company and other members of the HSBC Group to meet certain obligations to legal or regulatory bodies and government or tax authorities in Hong Kong and overseas. If you fail to provide to the Company information that is requested from you or if you present a financial crime risk to a member of the HSBC Group, such consequences as set out in your policy terms include that the Company may:

- Take such actions as are necessary to enable it or a member of the HSBC Group to meet its obligations;
- Be unable to provide new, or continue to provide all the services to you;
- Be required to withhold payments or benefits that would otherwise be due to you or your Policy and permanently pay those over to tax authorities; and
- Terminate your Policy.

Should any benefits or payments be withheld or the Policy be terminated by the Company, the amount you get back plus the total amount you have received before policy termination (if any) may be less than what you have paid. The Company recommends that you seek your own independent professional advice on your tax liabilities and tax position in relation to your Policy.
Termination conditions
The Company has the right to terminate the Policy under any of the following circumstances:

• If the Account Value is negative for 45 consecutive calendar days while the Policy is in force; or
• If you are unable to pay the Planned Premium and premium for Supplementary Benefits for 65 consecutive calendar days from its due date; or
• If the Company has the right to terminate pursuant to the terms of any Supplementary Benefits; or
• The Company reasonably consider that by continuing the Policy or the relationship with you the Company may break any laws or the Company, or a member of the HSBC Group, may be exposed to action censure from any authority.

Please refer to the Policy Provisions for detailed terms and conditions on termination.

Applicable laws
The laws governing the Policy are the laws of Bermuda. However, in the event of any dispute arising in the Hong Kong SAR, the non-exclusive jurisdiction of the Hong Kong SAR courts will apply.

Eligibility
The Plan is generally available to anyone who is between the Insurance Age of 15 days after birth and 65 for individual Policyholder or between the Insurance Age of 19 to 65 for corporate Policyholder. The Plan is subject to the relevant requirements on nationality and/or addresses and/or residency of the Policyholder and/or Life Insured as determined by the Company from time to time.

Policy currency
The Plan is available in US dollars. Both premiums and benefits can be paid in currencies other than the policy currency. Please refer to section “key risks-Policy currency risk” for the details of key risk factors.

Missing payment of premium
In order to keep the Policy in force, you must pay all Planned Premiums and any Supplementary Benefit Premiums when due and the Account Value must be sufficient to cover the policy charges. Your Policy will lapse when the Account Value is not sufficient to cover policy charges for 45 consecutive calendar days or when Planned Premiums and/or any Supplementary Benefit Premiums have been overdue for 65 consecutive calendar days.
KEY RISKS

Credit and insolvency risks

The product is an insurance policy issued by the Company. You are subject to the credit risk of the Company. Your premiums paid will form part of the Company’s assets. You do not have any rights or ownership over any of those assets. Your recourse is against the Company only.

Non-guaranteed benefit

The amount of benefit you will get upon Policy surrender or death of the Life Insured is uncertain as the entitlement amount depends on the prevailing Account Value of your Policy, which will be increased as credit interest earned and Loyalty Bonus paid and will be decreased as applicable policy charges deducted.

The General Crediting Interest Rate is not guaranteed and is determined at the discretion of the Company. The General Crediting Interest Rate, which applies to each Policy, depends on the investment returns on the underlying assets supporting the policies, as well as other factors, including but not limited to claims, lapse experience, expenses and the long term future investment returns outlook. If the investment returns over the long term are better than expected, then the General Crediting Interest Rate would increase and vice versa. The key risk factors are further described below:

- **Investment risk factors** – The investment performance of the assets supporting the policies could be affected by changes in interest rate and its outlook (which affect both interest earnings and values of assets), fluctuations in price of growth assets and various market risks including but not limited to credit risk and currency risk.

- **Claims factors** – The actual experience of mortality and morbidity is uncertain which may lead to a higher than expected claim or living benefit payment and impact the overall performance of the product.

- **Persistency factors** – The actual experience of policy surrender (full or partial) and policy lapse is uncertain, and therefore it has impacts on both the current performance and future return of the portfolio of the policies.

- **Expense factor** – The actual amount of any direct expenses (eg. Commission, underwriting, policy acquisition and maintenance expenses) and indirect expenses (eg. General overhead costs) incurred and apportioned to the group of policies may be higher than expected and impact the overall performance of the product.

Still, the General Crediting Interest Rate is subject to a Guaranteed Minimum Crediting Interest Rate depending on the Policy Year as determined by the Company at the time when the Policy is issued. Moreover, the rates of Policy Expense Charge and Insurance Charge, may be increased at the discretion of the Company. Please refer to the section “Details of fees and charges” for details. In the situation where the General Crediting Interest Rate fluctuates or Policy Expense Charge or Insurance Charge increases, there is a risk that the interest generated under the Policy is unable to cover the policy charges, and lead to 1) Surrender Value less than total premium paid, 2) policy lapses and 3) shorter life protection period. During the whole policy term, your Policy may be terminated if the total Account Value is not sufficient to cover all applicable charges. You could lose all your premiums paid and benefits accrued if any condition of early termination is triggered.
Risks from the delay or missing the payment of premiums due

Any delay or missing of the payment of Planned Premiums\(^2\) and any Supplementary Benefits Premiums\(^4\) due may lead to lower Account Value, Surrender Value, and Death Benefit, resulting in potential Policy lapses and shorter life protection period.

Loss of life protection/Death Benefit

Loss of life protection/Death Benefit when the Account Value is not sufficient to cover policy charges for 45 consecutive calendar days or when Planned Premium\(^2\) and/or any Supplementary Benefits Premiums\(^4\) have been overdue for 65 consecutive calendar days.

Risks from withdrawal\(^1\)

For a Policy where a withdrawal has been performed, there is a risk that the interest generated is unable to cover the policy charges for the remaining balance of the Account Value, and lead to 1) reduction in Death Benefit; 2) Policy lapses; and 3) shorter life protection period.

Risks from surrender

Surrender charge applies during the first 10 Policy Years. If you surrender the Policy in early years, the surrender proceeds to be received under the Policy may be significantly less than the premiums paid.

Liquidity risk

This Policy is designed to be held for a long term period. Should you have liquidity needs for any unexpected events, you may apply for surrender or withdrawal but the amount available for withdrawal is not guaranteed. However, it is subject to the respective policy terms and conditions, and may induce other risks as mentioned in “Risks from withdrawal” and “Risks from surrender”.

Inflation risk

Cost of living is likely to be higher in the future than it is today due to inflation, therefore you or your assigned Beneficiary(ies) may receive less from the Policy in real terms in the future even if the Company meets all its contractual obligations.

Policy currency risk

You are subject to exchange rate risks. If your Plan is denominated in currencies other than local currency, or, if you choose to pay premium or receive benefit in currencies other than the policy currency(ies), the actual amount paid or received by you will be subject to change according to the prevailing exchange rate to be determined by the Company from time to time between the policy currency and the local/ payment currencies. The fluctuation in exchange rates may have impact on the amount of payments including but not limited to premium payments, levy payments and benefit payments.

Risks from assigning your Policy

If your Policy is assigned to a lender (i.e. assignee) as collateral:

- You will be subject to interest rate risk, which may increase costs of serving the loan and risk of default in repaying the loan. Upon repayment default or failure to repay the loan under the relevant assignment or loan agreement or other facility agreements of similar nature, the assignee may exercise the right to surrender the Policy on your behalf. You may lose the life coverage and other benefits as a result.
- The Company will pay the Death Benefit or other protection amount first to the assignee (unless otherwise advised by the assignee) and any remaining balance of Death Benefit or other protection amount to the Policyholder or Beneficiary (as the case may be).
- You may also face the risk of policy information and personal data being released to the assignee.
Philosophy in deciding the General Crediting Interest Rates

The General Crediting Interest Rate is different by Policy Currency and product series. The rates are regularly reviewed by the Company at its discretion. The Company will inform Policyholders of any change of the General Crediting Interest Rates of their policies.

When determining the General Crediting Interest Rate, which applies to each Policy, the Company considers the investment returns on the underlying assets supporting the policies, as well as other factors, including but not limited to claims, lapse experience, expenses and the long term future investment returns outlook. If the investment returns over the long term are better than expected, then the General Crediting Interest Rate would increase and vice versa.

The investment returns on Goal Access Universal Life underlying portfolios include interest earnings as well as losses or gains realised upon the disposal of assets or asset impairments. The claims include the cost of providing the Death Benefit and other insured benefits under Goal Access Universal Life policies. The surrenders include total and partial surrenders, and their corresponding impact on investments. The investment returns on Goal Access Universal Life underlying portfolios are not guaranteed.

In order to ensure that discretion exercised when defining the General Crediting Interest Rates is fair to all Policyholders, and that any conflicting interests of Policyholders with other Policyholders and/or shareholders have been addressed having due regard to the fair treatment of Policyholders, the Company established a dedicated committee providing independent advice on the management of the universal life insurance products business.

Investment policy and strategy

The Company maintains a prudent approach to investing for the Goal Access Universal Life underlying portfolios, with the primary goal being the delivery of long term value to Policyholders.

The underlying assets of Goal Access Universal Life products are managed under a portfolio of assets denominated in USD and invested in different geographical markets (mainly US, Asia and Europe).

The portfolio is invested in corporate and government bonds under pre-determined diversification and rating objectives. The current long term investment strategy is to invest in diversified long term investment grade bonds rated BBB- or above. Unrated bonds may also be considered if they fit the Company's risk appetite profile. However, the Goal Access Universal Life underlying portfolios are conservatively positioned to limit the exposure to unrated bonds. The bonds are held by the Company, generally to maturity in order to match its long term liabilities. Subject to our investment policy, derivatives may be utilised to manage our investment risk exposure, for matching between assets and liabilities and for efficient portfolio management.

The Policy in determining the General Crediting Interest Rates may be reviewed and adjusted by the Company from time to time. For more updated information, please visit our website [https://www.personal.hsbc.com.hk/1/2/hk/insurance/life/detail#policy]. You may also visit the above website to understand the Company's historic crediting interest rates for reference purposes. The past performance or current performance of the Company's business may not be a guide for future performances.
Reduction in Sum Insured and cash withdrawals are subject to a Surrender Charge in the first ten Policy Years. Please refer to “Surrender Charge” under “Details of Fees and Charges” for details.

The Planned Premium is determined according to the age and gender of the Life Insured, Sum Insured, payment term, Policy Currency and a variety of health and lifestyle factors. All Planned Premiums must be paid during the premium payment period selected upon policy application.

The minimum and maximum amount (as determined by the Company from time to time) of Unscheduled Premiums per transaction are subject to change by the Company from time to time. The Company reserves the right to refuse, reduce or limit the number or amount of such Unscheduled Premiums payments in any Policy Years, except as required to keep this Policy in force.

The Supplementary Benefit Premium is determined according to the age and gender of the Life Insured, Sum Insured, payment term, Policy Currency and a variety of health and lifestyle factors. All Supplementary Benefit Premiums must be paid during the premium payment period selected upon policy application.

For the 5-year premium payment arrangement, if you choose to pay your Planned Premiums monthly for a Policy Year, the total Planned Premiums payable under the monthly payment mode for that Policy Year will be higher than that payable under the annual payment mode.

If the Life Insured dies by suicide, whether sane or insane, within one year of the Issue Date or from the effective date of reinstatement or the effective date of the last Change of Life Insured (if applicable) (whichever is the latest), the Company’s liability will be limited to the amount of premiums paid to the Company less any amount paid by the Company to you since the Policy Date.
