### Important notes

- The Wayfoong Multi-funding System ('WMFS') is a pooled occupational retirement scheme set up in 1992 in Bermuda.
- The WMFS together with all its Investment Portfolios are constituted in the form of an insurance policy issued by HSBC Life (International) Limited. Your investments are therefore subject to the credit risks of HSBC Life (International) Limited.
- Where your scheme is a defined contribution scheme, the benefit payments of your employees are calculated with reference to the fluctuation of the performance of the Investment Portfolios and subject to the terms and conditions of WMFS. Each of the Investment Portfolios has its own investment objectives and associated risks.
- Where your scheme is a defined benefit scheme, your liability to top-up any benefits payable to your employees are calculated based on a formula pre-determined by you and actuarial valuations and are also subject to the terms and conditions of WMFS. Each of the Investment Portfolios has its own investment objectives and associated risks.
- An employer may choose to put in place a trust arrangement in respect of its participation in WMFS. However, even with the set up of a trust arrangement, the appointed trustee will only be holding an insurance policy issued by HSBC Life (International) Limited and your investments are still subject to the credit risks of HSBC Life (International) Limited.
- Whether or not a trust arrangement is set up, the WMFS and all its Investment Portfolios are constituted in the form of an insurance policy and therefore you are not investing in the underlying funds/assets and you do not have any rights or ownership over the underlying funds/assets of the WMFS.
- If a trust arrangement is set up in respect of your participation, such arrangement is governed by the provisions
  of the trust deed and, to the extent expressly incorporated into such trust deed by reference, the relevant
  insurance policy.
- The guarantee of the Capital Guaranteed Fund is also given by HSBC Life (International) Limited. Your investments in the Capital Guaranteed Fund, if any, are therefore subject to the credit risks of HSBC Life (International) Limited.
- The guarantee of the Capital Guaranteed Fund is subject to the relevant guarantee features. Please refer to the Investment Portfolio Fact Sheet of the Capital Guaranteed Fund for full details of the relevant guarantee features and conditions.
- The guarantee of the Central Provident Fund is given by The Hongkong and Shanghai Banking Corporation Limited. Your investments in the Central Provident Fund, if any, are therefore also subject to the credit risks of The Hongkong and Shanghai Banking Corporation Limited.
- The guarantee of the Central Provident Fund is subject to the relevant guarantee features. Please refer to the Investment Portfolio Fact Sheet of the Central Provident Fund for full details of the relevant guarantee features and conditions.
- The Central Provident Fund has been closed to new contributions or money with effect from 1 June 2010.
- You should consider your own risk tolerance level and financial circumstances before choosing any Investment Portfolio. When, in your selection of Investment Portfolios, you are in doubt as to whether a certain Investment Portfolio is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the Investment Portfolio(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone and should read the relevant 'Principal Brochure'.
- Investment involves risks. Past performance is not indicative of future performance. The value of financial instruments, in particular stocks and shares, and any income from such financial instruments, may go down as well as up. For further details including the product features and risks involved, please refer to the 'Principal Brochure'.

# 市場概覽 MARKET OVERVIEW

### 股票市場 EQUITIES <sub>美國 USA</sub>

美國股票於季內上升,大部分升幅來自六月。隨著通脹升溫,加上美國經濟在高息環 境下仍保持韌性,本地股票市場上升。季內,資訊科技股主導股票市場升勢。人工 智能掀起熱潮,加上相關科技有機會取得突破,帶動晶片製造商等科技股上升。多 元化消費品及通訊服務股同樣大幅上升,但能源及公用事業等板塊表現遜色。

US equities ended the quarter higher, with the bulk of the gains made in June. The advance came amid moderating inflation and signs that the US economy remains resilient in spite of higher interest rates. The Information Technology sector led the stock market advance in the quarter. Fervour around artificial intelligence (AI) and the potential for a boom in related technology drove chipmakers, in particular, higher. The Consumer Discretionary and Communication Services sectors also performed strongly. Underperforming sectors included Energy and Utilities.

### 歐洲 EUROPE

在金融及資訊科技股帶動下,歐元區股票於第二季上升,但能源及通訊服務等板塊表 現遜色。半導體股上升,刺激資訊科技股造好。由於部分美國晶片製造商股的銷售 額預測高於預期,反映人工智能的增長潛力,利好半導體股表現。市場預計銀行股 短線盈利表現強勁,利好金融股表現。

Eurozone stocks posted gains in the second quarter with the advance led by the Financials and IT sectors. Underperforming sectors included Energy and Communication Services. The IT sector was boosted by semiconductor stocks. This came in the wake of higher-than-expected sales projections from some US

chipmakers, which helped demonstrate the growth potential stemming from AI. Among Financials, Banks outperformed as their near-term earnings are expected to be strong.

### 亞洲 ASIA

市場憂慮中國經濟前景及持續不斷的地緣政治風險,拖累中國股票下跌,令亞洲(日本除外)股票於第二 季回落。然而,季內其他普遍亞洲市場跟隨環球市場升勢,原因是區內央行因應通脹回落 而暫緩政策收緊措施。市場對印度市場的宏觀經濟韌力感到樂觀,加上外資持續流入, 帶動印度股票表現領先。在人工智能創新、電動車及電池主題帶動下,市場持續預期 長遠晶片前景需求穩健,台灣及南韓股票造好。

Asia ex Japan equities retreated in the second quarter, led by the losses in Chinese equities amid worries over China's economic outlook and lingering geopolitical risks. However, other Asian markets broadly tracked global peers' gains in the quarter as the central banks in the region paused their policy tightening following some disinflation progress. Indian equities outperformed on optimism about its macro resilience, with ongoing foreign fund inflows. Taiwanese and Korean equities also fared well amid continuing expectations about a solid longer-term demand outlook of chips, driven by Al innovation, as well as electric vehicle and battery theme.

#### 股票市場 EQUITIES (績 con't)

#### 日本 JAPAN

在日圓轉弱下,加上日本央行在「核心通脹」飆升下仍維持超寬鬆政策,帶動工業、金融、科技及公用事業 股上升,日本股票於第二季延續升浪,並突破數十年來高位。日本股票估值較其他已發展市場有所折讓, 加上市場樂觀看待日本重啟後對消費及服務業的需求,即使製造業活動受外圍不利因素加劇影響而停滯 不前,亦成功吸引資金流入。在物價不斷攀升及上市公司股價低於賬面值情況下,投資者仍觀望央行推出 潛在政策。

Japanese equities gained further and refreshed its multi-decade high in the second quarter amid a weakening yen, led by the rallies in Industrials, Financials, Technology, and Utilities stocks as the Bank of Japan sticks to its ultra-loose policy despite a surge in Japan's 'core-core' inflation. Japanese stocks' valuation discount to their developed market peers attracted fund inflows, alongside optimism on Japan's reopening effects on consumption and services demand, even though manufacturing activities stayed stagnated amid elevated external headwinds. Investors still eye on the central bank's potential moves amid mounting price pressures and any reform made by those listed companies trading below their par value.

#### 中國 CHINA

受市場憂慮中國經濟前景及持續不斷的地緣政治風險影響,中國股票於第二季下跌。 大部分板塊下挫,物料、房地產及多元化消費品股跌幅較大。當前充斥多個外圍不利 因素,導致貿易環境仍然挑戰重重,而經濟指標也反映初期經濟重啟的動力正在消 退,內需表現轉弱,而即使製造業似乎逐漸企穩,但房地產市場復甦勢頭黯淡。然 而,中國股票估值仍處於較吸引水平,若當局推出更多針對性的政策措施來重振經 濟增長及投資者信心,企業盈利預測可望向上調整。

Chinese equities fell in the second quarter on worries over China's economic outlook and lingering geopolitical risks. Broad-based sectoral declines were noted, with Materials, Real Estate, and Consumer Discretionary stocks seeing sharper falls. While the trade environment remains challenging on prevailing external headwinds, the economic indicators signaled a fading initial reopening impulse and softening domestic

demand, alongside a sluggish recovery in the property market despite some stabilization signs in manufacturing. However, Chinese stocks' valuations maintain relatively attractive levels, and upward revisions on earnings estimates are possible should the rollout of more targeted policy measures help revive growth and investor confidence.

### 香港 HONG KONG

市場對中國的經濟憂慮繼續打擊投資者情緒,香港股票於第二季延續跌勢。然而, 隨著重啟後跨境活動復常,即使當前面臨多項外圍不利因素,周期經濟復甦仍然持 續,使香港宏觀經濟環境逐漸穩定,有利企業盈利前景。季內,本地利率回升,但 美國可能於第三季暫停加息,進一步上行風險依然在控制範圍內,而穩定的就業市 場及放寬按揭成數令房地產市場壓力有所紓緩。另外,香港股票估值遠低於長期平 均值,於整固後更具吸引力。

Hong Kong equities extended losses in the second quarter as the economic worries over China still weighed on investor sentiment. Nevertheless, Hong Kong's stabilizing macro backdrop should support the earnings outlook as resumptions of cross-border activities after reopening continue to drive its cyclical recovery despite prevailing external headwinds. Domestic interest rates rebounded in the quarter, but further upside risk remains manageable as the US potentially pauses rate hikes in the third quarter, alleviating pressures on the property market with a stable job market and relaxations of mortgage rules. Additionally, their valuations, which were well below the longer-term average, are more appealing after consolidations.

### 債券及貨幣市場 BONDS AND CURRENCIES

於二零二三年第二季,市場波動性大幅降低。政府債券收益率再度上升,但表現參 差。受通脹高於預期影響,加上央行加大力度抗衡通脹,英國及澳洲政府債券表現 落後。儘管違約率略為上升,企業資產負債能力維持相對強勁。短期經濟衰退的憂 慮降溫,令環球高收益債券表現領先環球投資級別債券。

隨著環球經濟增長改善及日圓等低息貨幣表現遜色,市場對環球經濟增長的情緒好 轉。另一方面,在利率上升支持下,英鎊表現最為出色。

The second quarter of 2023 saw a significant drop in market volatility. Government bond yields were on the rise again, although there was some divergence, with the UK and Australia underperforming due to higher-than-expected inflation and a greater resolve by central banks to combat inflation. Corporate balance sheets remained relatively strong, despite some uptick in default rates. Global high yield outperformed global investment grade as immediate recessionary concerns were pared back.

As sentiment for global growth improved, lower yielding currencies, such as the Japanese yen performed poorly. At the other end of the spectrum, sterling was the best performer, supported by higher interest rates.

### 總結 SUMMARY

預期市場於未來六個月至十二個月將迎來動盪環境,經濟數據將變得參差,而數據為本的政策將驅使 市況反覆波動。因此,我們的內部觀點仍是建議防守性資產配置。

短線固定收益資產仍具吸引力,尤其是美國國庫券,可望在經濟衰退期間帶來出色表現。優質信貸迎來 收益投資良機,選持資產負債表穩健的發行人可減低違約風險。

鑑於估值便宜、投資者持審慎態度及宏觀經濟前景遠勝已發展市場,我們看好多個新興市場資產類別。 展望聯儲局於今年較後時間減息及美元進一步轉弱,亦利好相關資產表現。

We expect a choppy environment over the coming 6 months to 12 months, with noisy economic data and data-dependent policy guaranteeing further market volatility. As such, our house view remains for a defensive asset allocation.

Short-duration fixed income remains attractive, especially US Treasuries, which can outperform in a recession. There are good income opportunities in high-quality credits, with solid balance sheets reducing default risk.

We are positive on many emerging markets asset classes given lower valuations, cautious investor positioning and a much better macro outlook versus developed markets. The prospect of Federal Reserve cuts and further US dollar weakness later in the year is also supportive.

基金展望 Fund outlook ニマニ三年第二季・受美國債務上限及通脹持續高企憂慮影響・加上各主要已發展市場央行措辭強硬・導致投資者調整加息預期・使環球債券收益率上升。消費開支表現強 動・一方面是收入顯著上升・另一方面反映勞工市場仍然緊張・帶動第一季美國國內生產總值有所增長。然而・企業勞動力需求初步顧示出下跌跡象。物價壓力持續緩和・整 體通脹回落速度較核心通脹快。六月,聯結局維持政策利率不受。儘管聯結局可能於七月再度加息,但當局的強硬取態可能逐漸減退,並可能在經濟顯著惡化時考慮減息。回 顧期內、歐元區經濟數據轉弱,並向下修訂第一季增長預測、而消費者信心指數亦有所下跌。雖然整體過脹回落,但在核心過脹持續高企下,歐洲央行維持強硬立場。同樣 地・英倫銀行於五月及六月先後加息、因為當地通脹情況尤其嚴重・而且工資不斷上升。李內,美國國庫券曲線趨升,在通脹降溫及經濟衰退風險龍單下,兩年期及十年期息 差仍然是負數。

基金於李內錄得負回報。存續期配置成為基金表現的主要拖累因素,尤其是債券收益率普遍上升,基金持有的美國國庫券及英國政府債券表現遜色,但中國政府債券表現抵 銷部分損失,原因是中國主權債券收益率曲線趨跌。此外,外匯持倉亦拖累基金表現,主要是日圓及人民幣。相反,亞洲信貸配置帶動回報上升,銀行、投資公司及能源債券 尤其造好。另外,套利策略亦為基金帶來額外收益。

Over the second quarter of 2023, global bond yields rose on the back of concerns over US debt ceiling, sticky inflation, and hawkish rhetoric across major developed markets central banks that had investors revise their rate hike expectations. In the US, the first quarter of gross domestic product growth held up on the back of robust consumer spending, supported by strong income growth and reflecting a still tight labour market. Nevertheless, there have been early signs of cooling in corporate labour demand. Price pressure has continued to ease over time with headline inflation falling faster than core inflation. The Federal Reserve (Fed) left the policy rate unchanged in June. Despite another possible hike in July, the Fed is likely at peak hawkishness and may start to cut rates in the event of notable deterioration in the economy. The eurozone saw a weaker set of economic data during the review period, with growth forecast revised downwards in the first quarter and consumer confidence indicators also coming down. Although headline inflation offaltion in the UK proving to be particularly problematic with stubborn wage growth. During the quarter, the US Treasury curve shifted higher with 2-year/10-year spread remained negative in light of cooling inflation and looming down.

The fund registered a negative return over the quarter. Duration exposure detracted the most from the performance, particularly from the fund's positions in US Treasuries and UK government bonds as yields moved broadly higher, mildly offsetting by China government bonds amid the downward shifting China sovereign yield curve. Foreign exchange impact also detracted, predominantly from the Japanese Yen and the Renminbi. Conversely, credit exposure in Asia lifted the returns, particularly from Bank, Investment companies, and Energy bonds. Meanwhile, yield carry also helped adding value.

During the quarter, the differential between US and HK rates continued to put pressure on the HKD. The USD/HKD has reached the higher-end of the band and the HKMA intervened to defend the currency. The Aggregate Balance therefore dropped to HKD45 billion from HKD77 billion last quarter. The Hong Kong Interbank Offered Rate (HIBOR) curve shifted isgnificantly higher over the quarter. HIBOR 1-month was 179 bps higher at 4.39%, whereas HIBOR 3-month and 6-month moved higher by 126 bps to 4.97% respectively. Rate differentials between US and HK significantly narrowed over the quarter. In 1-month, 3-month, 6-month and 12-month London Interbank Offered Rate (LIBOR) rates are higher than HIBOR by 28 bps, 80 bps and 101 bps respectively. 3-month Exchange Fund Bills (EFB) yield moved higher to 4.17% versus 2.69% last quarter. The Fund Manager continued using the design and short-term Hong Kong Treasury Bills for liquidity management. Given HIBOR curve continued to shift higher over the quarter, we have taken the advantage of the attractive term premium by extending into 3-month/4-month/6-month deposit/Certificate of Deposit space whenever term rates react to tightened funding. We also rolled some maturities into the year-end given the expectation of peaking of US policy rate later in the year. Since HIBOR curve turned largely flat from 1-month to 6-month over the quarter, we have selectively positioned some maturities around end July given the anticipation of one more hike in the Fed July meeting. The fund ended the quarter with a weighted average maturity (WAM) of 50 days versus 41 days last quarter. Comments from Fed officials have indicated a preference for further rate hike this year. Meanwhile upcoming dividend payment season between July and August should continue to tighter HKD funding and keep HIBOR curve supported. Rate differentials between US and HK should continue to put pressure on HKD rates while tighterend Aggregate Balance and the seasonal demand remain the drivers of front end volatility. - The fund was unitised on 1 January 2000.
- <sup>△</sup> The launch date of the Hang Seng Index Tracker Fund refers to the date on which the first valuation takes place. The fund has been available under WMFS from 23 November 2020, however, the fund performance is calculated from its launch date.
- <sup>++</sup> Declared Rate is declared annually at the end of the financial year. The year-to-date Declared Rate is determined based on the difference in the unit prices over the relevant period and is for reference only.
  - For Central Provident Fund, both the Declared Rate and the yearto-date Declared Rate on an annualised basis would not be less than the guaranteed return as stated in the investment objectives of the fund.
  - For Capital Guaranteed Fund, both the Declared Rate and the yearto-date Declared Rate would not be negative.

When the Declared Rate of the year has been declared as soon as practicable after 31 December each year, the value of each members' account will be adjusted in the form of additional units in order to ensure that the return of that member's investments in the fund for that year is in accordance with the Declared Rate. Conversely, the member would not be entitled to such additional units should the member's investment be redeemed from the fund in the middle of a financial year, and the return of the member would be calculated according to the year-to-date Declared Rate which could be less than the Declared Rate.

- \* Percentage may not add up to 100 due to rounding.
- <sup>+</sup> Cumulative performance is calculated based on the unit price of the last valuation day at the end of the quarter.
- <sup>§</sup> Period returns are calculated based on the unit price of the last business day of each year.

Cumulative performance and period return are calculated in the fund currency on the basis of NAV-to-NAV (net asset value).

 The risk rating is defined using a 5-point risk scale with risk rating "1" representing the lowest risk and risk rating "5" representing the highest risk. The risk rating is derived based on a combination of quantitative and qualitative risk factors including price volatility, asset allocation and liquidity.

The following provides a general description of the risk rating categorisation.

1 = Low Risk - Minimal chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate minimal price fluctuations over short periods of time.

2 = Low to Medium Risk – Low chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate moderately low level of price fluctuations over short periods of time.

3 = Medium Risk – Moderate chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate moderate level of price fluctuations over short periods of time.

4 = Medium to High Risk – Moderately high chance of losing a significant portion of your capital over the term of the investment. Expected to demonstrate moderately high level of price fluctuations over short periods of time.

5 = High Risk – High chance of losing a significant portion of your capital over the term of the investment. Expected to demonstrate high level of price fluctuations over short periods of time.

請注意,我們並沒有為運豐公積金及國際公積金提供一個風險級數。這是由於個別投資者於該基金所得的實際投資回報,除取決於該基金的相關資產的實際投資回報之外,亦需視乎保單內所 載的保證條件是否符合。而保證條件是否符合,則視乎個別投資者的實際情況而定,令其所面對的實際風險可能和其他投資者不同。因此,一個能反映個別投資者投資於該基金所面對的實際 風險的風險級數並不存在。Please note that risk rating has not been provided for the Wayfoong Provident Fund and International Provident Fund. This is because the actual return to an individual investor is dependent on the actual investment return of the underlying assets of the Fund, and whether the guarantee conditions as prescribed in the insurance policy, is fulfilled, which is based on the individual investor's own circumstance. As such, the actual risk to which an individual investor is exposed can be very different for different individuals. Therefore, it is not possible to provide a risk rating that reflects the actual risk of this Fund to an individual investor.
